

## TECHNICAL SPECIFICATION OF YOUR PC

If you want to use the E-Learning REACH you need a standard multimedia PC with loudspeakers and a fast internet connection (a DSL connection is recommended).

This E-Learning is optimised for two browsers:

- The Internet Explorer (version 6x, 7x)
- Mozilla Firefox (version 2x)

It is also necessary to have the macromedia flash player installed. If you don't have it already, it is available as a freeware, and can be downloaded from:

<http://adobe-flash-player.softonic.de/>

It is important to ensure that the latest version of the above software is installed.

It is also recommended that the browser will allow cookies and active x.

In case you encounter any technical problems, please write an email (see contact and feedback).

If you have problems fitting the presentation into an acceptable screen size, you may click on F11, which removes the browser menu parts. You can always come back to the starting point by re-clicking on F11.
